First company to do bi-fold doors right...

Sing bi-fold doors are so strong, stiff and light-weight that they will not sag or wear the hinges. They need no slider track, so they are secure and airtight. Sing offers pricing competitive with steel doors and superior quality to wooden doors.

- Only bi-fold garage carriage door that won't sag
- Matching Garage Organizer available
- Wood with minimum the maintenance

Torsion Box Technology

Sing Honeycomb brings torsion box strength to the housing industry. Patented Sing core tested in UW Engineering Lab reached over 660 PSI. We can even use 1/8" surface skin without jeopardizing the integrity of our panels because our technology is so advanced.
