

## Consignment Opportunities Available For Retail Merchants

We have been developing our honeycomb products since 1992 with the idea to bring superior products to our customers and provide jobs to people in America. Please consider joining our team and become a consignment partner.

We will place our furniture in your store on consignment so you can offer our product, with no up front cost to you.

You can choose to sell your floor model or we will manufacture the same item for your customer and ship directly from our factory.

Sing Honeycomb Products, while all different, all have the same beginning, a vision that all of our products have a long and productive life, whether it's a door, a dresser, or a cutting board. To that end we ensure the following:

- Our panels use only real wood and real wood veneer and recycled polyurethane or eps foam
- Non-Toxic Glues are used
- All of our panels are manufactured right here in the USA, none of our manufacturing is outsourced to other countries

### Sing Honeycomb - One of the most earth friendly materials ever invented

1. **Renewable - Wood Veneer**, grown under the sun for millions of years, veneer is made of wood fiber which is a component of our Sing Honeycomb with gives it it's strength and is an eco-friendly fiber.
2. **Strength** - Sing Honeycomb core® is the strongest, most lightweight and eco-friendly core material ever invented. Pound for pound our honeycomb core is stronger than steel and our core is approximately 30 times lighter than other honeycomb products (generally made of paper honeycomb) out on the market today.
3. **Lightweight** - Sing Honeycomb core weight is approximately 4 lbs. per cubic foot which amounts to slightly less than the weight of Balsa wood, which is considered one of the lightest woods in the world.
4. **Energy Saving** - It takes less energy to produce and ship than other known structure materials such as solid wood, engineered wood, metal, plastic, brick, concrete, glass, etc...
5. **Long Life** - The lifespan of our Sing Honeycomb Products are designed to last you the customer for years and years rather than months, which means the extended lifespan of our Sing Honeycomb products could last you from your child to your great-grandchildren.
6. **Endless Applications** - Our Sing Honeycomb is what we consider to be a miracle material that is the answer to many problems in many industries. Buildings, wall systems, furniture, flooring and more.

Thank you

Peter Sing

## Sing Honeycomb Furniture

The future of modern furnishings

Proud to say: Made in the U.S.A.  
[www.ltwtfurniture.com](http://www.ltwtfurniture.com)

## Sing Furniture lives by the principle that

Less can be more, less weight, means our furniture can be moved with less effort.

Less particle board or MDF as in NONE, not one bit. We think furniture should be made of quality items.

Our furniture weighs at least 1/3 less than comparable furniture, and there's no MDF or fiber-board to add to the weight. Our furniture is easier to put together. Stronger than the standard fiberboard furniture on the market, our dresser drawers are strong enough for a man to stand on so you can store more in your dresser drawers with no worries about the drawer bottoms falling out or falling apart.

## Modular Furniture

Sing honeycomb furniture can be taken apart and put back together as many times as you need and light enough to be moved wherever you need it.

That means the dresser you sent to your son in college can go with him to his new apartment after graduation...

The armoire you purchase for your children can be passed down to your great grandchildren...

That beautiful kitchen island cabinet with the exquisite butcher block top not only looks great in the kitchen but is exactly what's needed outside during the family bbq.

## At The Heart of Sing Furniture

is the desire to be better and last longer, because furniture that last longer is a better value overall. Anyone can buy a cheap set of furniture that may last at the most 3 years, but if you're replacing your furniture every 3 years that bargain furniture that you bought is no bargain at all. Furniture should be viewed as an investment in your home, something that will stand the test of time and continue functioning long after the value brand furniture has gone to the landfill.

That's why our furniture offers these features:

- Drawers are all hardwood
- All furniture is put together with pocket screws that go into actual wood for better strength and endurance to daily use
- Furniture that is both light and strong
- Drawer sliding mechanisms are precision placed so drawers open and close smoothly and drawers sit flush to the furniture
- Our cabinets come in customer's choice of standard or butcher block tops
- Choose between our already made furniture or purchase our furniture panels to design your furniture with your custom choices
